It is the tallest building of its kind in the world, built entirely of cement, without any supporting metal structure. Its shape and design are reminiscent of a lotus flower, making it not only tall but also stunning. Telescopes are also provided to help you view the landscape.

You can choose to simply visit the deck, which offers a 360-degree panoramic view, or combine the view with lunch or dinner in the revolving restaurant, where you can simply sit back, enjoy a delicious meal, and relax while watching Cairo go by throughout the hour-long rotation (at an additional cost).

This tour is available at any time of the day, including sunset when the view is even more breathtaking. You can also take a [Cairo-by-night tour](#) to see Cairo at night when the city is illuminated by countless lights, which is just as enchanting!
